Technology from Ideas Limited

New Agreement Signed with the Trinity College Dublin

Technology from Ideas Limited (TfI), an Irish technology commercialisation company, is pleased to announce that it has signed a new technology commercialisation agreement with Trinity College Dublin (TCD). The agreement will enable TfI to source technology ideas from TCD researchers and then develop these ideas into investment ready technologies for subsequent sale to industry.

Commenting on today's announcement, Dan Richardson, TfI's Managing Director, said: "We are very excited about working with Trinity College and their researchers. This is our second Agreement with an Irish university following on from the one signed with NUIG in May. The Agreements enable us to work directly with researchers and support the commercialisation of their ideas. Our aim is to work alongside the Research & Innovation Services office and offer an alternative route to market for ideas requiring further development activity. Building a long-term relationship with both the university and its researchers is crucial for us and we're looking forward to working on projects in the very near future."

Dr David Lloyd, Associate Dean of Research, TCD said:

"Trinity College is pleased to have finalised this Agreement. TfI offers expertise to Irish Technology Transfer Offices to help them better support their researchers in realising value from their ideas. We see TfI as an important IP focused company to have here in Ireland, as its unique business model, coupled with a good network of sales partners, will support our collective drive to commercialise our Intellectual Property (IP) portfolios."

Notes for editors

Technology from Ideas (TfI) is a new Irish technology commercialisation company partnered by key players in universities and industry. TfI locates unrealised ideas from university researchers, develops them into investment ready technologies, and sells them to customers worldwide for subsequent development into products. This is achieved through commercially focused development in our own laboratories together with sales through established technology development company partners.

Trinity College Dublin (TCD), founded in 1592, is the oldest university in Ireland. Trinity College is the sole constituent college of the University. At present there are over 15,000 students, of whom 4,000 are postgraduates and over 2,200 staff members working on the College campus. TCD is Ireland's leading research university through publications, research collaborations, prestigious awards, international ranking systems, and innovation and technology transfer.
